- 8,6" aluminium tonearm
- 4-way ball cardan bearing with VTA setting
- E(asy)motion Wire Inner tonearm cabling
- Preadjusted Ortofon Quintet Red MC cartridge
- Stiff carbon fiber headshell
- Heavy aluminum sandwich platter
- Internal platter damping + a copper mass ring
- Brass platter bearing with Teflon mirror
- 33/45/78 RPM electronic regulated DC motor
- Vibration-damped wooden sub-chassis
- Belt drive with polished flat belt
- Viscosity-damped tonearm lift
- Made in Germany

Speed RPM: 33, 45, 78

Wow & Flutter in % DIN: 0.05 %

Rumble: 48 dB

SNR: 72 dB

Cartridge: Ortofon Quintet Red

Output: Phono RCA + ground cable

Dimensions (WxHxD): 440 x 135 x 370 mm

Weight: 8,3 kg

Colour: highgloss black, satin black

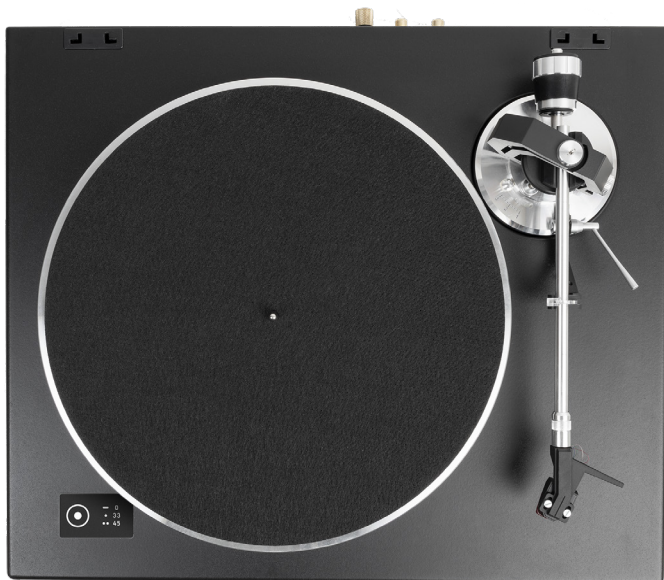

Power supply: 12V DC, 150 mA

Incl. accessories: cable, dust cover, singles adapter

The REKKORD M600

With the REKKORD M600 we are expanding our portfolio of manual turntables with an audiophile top model. The turntable is built into a noble and at the same time massive wooden chassis and is therefore the highlight in every listening room, both in terms of sound and appearance.

The M600 is equipped with an 8.6 „aluminum to-nearm specially developed for this turntable. The height-adjustable arm has a 4-way ball cardan bearing made of solid aluminum blocks and a particularly torsion-resistant carbon tonearm head.

Special aluminum platter

The aluminum sandwich platter is weighted with damping rings made of copper in order to increase the mass and thus ensure the most accurate and stable speeds. In addition, there is a dampening pou- ring compound inside to minimize the resonances.

The platter bearing made of brass is characterized by its extremely smooth running. A bearing mirror made of Teflon makes the bearing extremely durable. The platter is driven by a precision flat belt and a DC motor with speed regulation. In addition to the speeds 33 1/3 and 45 rpm, 78 rpm are also possible.

High quality MC system

The M600 is optionally available with a preadjusted Ortofon Quintet Red cartridge. This impresses with its high dynamics and first-class resolution. The spatial representation and tonal balance are excellent, making it the perfect partner for the REKKORD M600.

The clean and modern workmanship paired with the outstanding and precise technology from the Black Forest in Germany make the M600 the perfect turntable in your hi-fi system.
